LEGEND OF MATERIALS	
A	FOUNDATIONS
a1	REFER TO STRUCTURAL ENGINEER'S DETAIL FOUNDATION DRAWINGS FOR SIZE AND DEPTH OF FOOTINGS, COLUMNS AND RETAINING WALLS.
a2	Provide Vertical tanking at all retaining walls, basements & level changes. POLYGLASS torch-on waterproofing membrane system fixed to accordance with manufacturer's specs. All waterproofed walls to be protected and backfilled over geogrid covered with membrane and stone, as per specialist.
B	FLOORS AND SURFACES
b1	CONCRETE FLOOR slab min 100mm thick to Engineer's specification, on GUMBLE DTB GREEN 200mm, on min 150mm good, clean hard core consolidated fit treated with an prime. Hard core fit to be compacted to Engineer's specification. All bathroom floors to be cast 50mm lower than general FOG to allow for floor drains with min 1:100 fall. Provide underfloor heating to designated areas as per specialist.
b2	Structural walls, supports and beams to Eng. spec. All bathroom walls to be cast 50mm lower than general FOG to allow for floor drains with min 1:100 fall. Exposed slab to be waterproofed with POLYGLASS torch-on waterproofing by specialist. Internal building spaces below slab, or semi-internal waterproofing if required, to be waterproofed by specialist. Both to be applied on top of screed to fall of 1:100 with finish to spec (reference to SANS10400-B).
b3	RC staircase to Architect's and Engineer's detail. Where stairs are over or adjacent to interior spaces, the stair surface, nosing, treads & sides should be screeded to fall & waterproofed by specialist. Allow for dedicated finish over.
b4	Terrazzo: Cementitious waterproofing on Aluminium base outdoors and torch on waterproofing from 200mm inwards in accordance to detail.
b5	Concrete Reinforced Bedding as per spec. by specialist on concrete deck with screed to fall.
b6	Hardwearing Stone Aggregate: Ready-mix 40-60mm thick with stone aggregate (4-10mm) spread, packed with damped roller to expose stone. Provide 100mm Steel Mesh in screed, joint lines @ approx 2.5 x 3.5 (Cut lines 20-30mm deep x 2.5mm wide) (Sample of stone to be submitted for approval by Architect).
b7	Brushed Stone Aggregate: Ready-mix 100mm thick stone aggregate (15mm) screed, brushed to expose stone. Provide 100mm Steel Mesh in screed @ approx 2.5 x 3.5 (Cut lines 20-30mm deep x 2.5mm wide) (Sample of stone to be submitted for approval by Architect).
b8	Maple Magnesium Oxide floor on screed by specialist, sealed. Colour TBC by Architect. Joint lines saw cut by installer as indicated on drawings and approved by specialist. Stone angles at floor finish cross overs and stair nosings should be painted with Duane NRG Grey and top exposed surface of angle should be expert clean of paint. Sample approved by architect.
b9	Salvaged Tiles on Resilient waterproofing to floor laid to min 1:100 fall as shown. Grouting joints and colour to be confirmed by Architect. All floor and wall joints to line up.
C	WALLS
c1	Clay stock bricks, burn pointed with floated and sponged unadorned 20-25mm cement plaster to receive Architect specified finish. All bricks to be wet before laid. Provide 25mm subsoil wall insulation to the walls and all external cavity walls. Installed strictly as per manufacturer's specification. To comply with SANS10400-1 (11.3.3). Sample wall to be approved by HCA and client.
c2	GUMBLE AT BRICKWORK Joints, under all walls and chills, back-bone every courses.
c3	Retaining Wall by Structural Engineer
c4	RC Ring Beam by Structural Engineer
c5	Sliding, 60 high covered joint in plastered wall. Sample to be approved by architect.
c6	Cementitious Waterproofing on sloped plaster to top of boundary & parapet walls, painted to spec.
c7	Salvaged & Handrails: Refer to Architect's detail. To comply with SANS104000, 1m high from FFL with no opening that permits the passage of a 100mm ball.
c8	Paint: plaster to receive approved undercoat & textured paint, Midco Midamate Medium or similar approved. Colour for 5 Arch, and as per HCA architectural guidelines.
c9	Natural stone to HCA approval
c10	Clay stock bricks to receive Architect specified finish. All bricks to be wet before laid. Sample wall to be approved by HCA and client.
c11	Landscaped beam with slope by ang. covered with hessian / membrane and plastered, all by specialist
c12	In-situ concrete columns by eng., plaster and painted to match walls.
D	CEILING
d1	Ceiling Insulation Provide 2x 135mm battens insulation, 1x Layer fixed between purlins and 1x layer under purlins. Filing to be by specialist & approved by Arch. Provide "ALLUBUBBLE 198F" insulation over purlins under sheeting, install according to manufacturer's specification. To comply with SANS1381 part 1st and SANS10400-XA.
d2	8mm RHINOBOARD (Internal ceiling board) approved specialist fixed to underside of roof structure. DOWN ceiling trim shadowline detail between wall & RHINOBOARD ceiling.
d3	15mm RHINOBOARD (External moisture resistant ceiling board) approved specialist fixed to underside of roof structure. Allow shadowline detail between wall & ceiling. (Refer to drawing: direction of cladding, joints taped, trim skinned over taped joints and then fully skim plastered and painted to match walls.
d4	Plaster to underside of concrete slabs, staircases & concrete beams. Plaster & paint finish to match walls. NOT plastered. All joints to receive stop joint per Arch. Detail.
E	ROOF
e1	Double Pitch (See drawings for pitch) metal sheet roof consisting of Victorian Profile 0.53mm COLORBOND ULTRA AZ500 sheeting. Colour to be confirmed by Architect. Fasteners to be Class 4 and installed according to manufacturer's specification. Sheets to overlap by 2x ribs at joints. Provide lap seal at joints. Roof structure by Eng. Shop drawings to be submitted to Architect for approval.
e2	Monoc Pitch (See drawings for pitch) metal sheet roof consisting of Victorian Profile 0.53mm COLORBOND ULTRA AZ500 sheeting. Colour to be confirmed by Architect. Fasteners to be Class 4 and installed per manufacturer's specification. Sheets to overlap by 2x ribs at joints. Provide lap seal at joints. Roof structure by Eng. Shop drawings to be submitted to Architect for approval.
e3	Flat Pitch: RC slab to Eng. spec. with min. 30mm concrete and to min 1:100 fall. Double layer POLYGLASS waterproofing by specialist over screed covered with 80mm DIPSIS insulation board with membrane cover. Finish with 50mm stone layer (150mm) over 1:100 fall. Facias board painted same as wall. Shop drawings to be submitted to Architect for approval.
e4	Steel Sheet Roof Flashing to be manufactured from 0.53mm COLORBOND G300 flashing lead Clean Gutterboard, color to match roof sheeting. It's a 160 Miter. Facias board painted same as wall. Shop drawings to be submitted to Architect for approval.
e5	Open half round gutters, Euro Profile & downpipes. Colour to be confirmed by Architect. Sizes TBC by engineer/specialist & approved by Architect.
e6	Masonry Construction Chimney / Stainless Steel Turbo Cool with flue pipes. Cool and flue by specialist, refer to Architect's detail. All chimneys to comply with SANS10400 Part 1. Note: All flue pipes to be insulated as per specialist where exposed to flammable material - ie. Ceilings etc.
F	DOORS AND WINDOWS
f1	Glazing to comply with SANS10400 Part 2.
f2	All doors, windows and external shutters to be powder coated Aluminium. Refer to door and window schedules. Colour to be confirmed by Architect.
f3	Sloped plastered & waterproof oill, with built in drip & drip to Architect's detail & painted to spec.
f4	Cavities for Pocket windows & doors. Cavity depth to be min 100mm deeper than slider length. Cavity walls to be lagged & primed with Black Insulac 1st height & width full walls. Discrepancy max. 20mm over entire length/height work. Cavity floors to be sealed with Resilient both sides of angle & min 2

ELECTRICAL LEGEND	
	DISTRIBUTION BOARD
	STONE POWER CIRCUIT ISOLATOR
	DOUBLE 15 amp POWER OUTLET IN CEILING OR AT HIGH LEVEL
	DOUBLE 15 amp POWER OUTLET 1100mm HIGH
	DOUBLE 15 amp POWER OUTLET 300mm HIGH
	EURO COMBINATION PLUG 15 amp POWER OUTLET 1100mm HIGH OR AT 1500mm ABOVE COUNTER TOP
	ISOLATOR SWITCH FOR AIR CONDITIONER UNIT WATERPROOF PRATTLE TERMINATION BOX
	WALL LIGHT
	CEILING LIGHT
	ELECTRICAL GEYSER POSITION (200 ltr)
	DSTV - TELEVISION POINT
	DOUBLE TUBE LED LIGHT
	SWITCH
	CEILING FAN WITH LIGHT
	HANGING PENDANT
	PULL-OUT RETRACTABLE PLUG MOUNTED IN CUPBOARD TOP - COLOUR TO ARCHITECTS
	DOUBLE 15 amp WATER PROOF POWER OUTLET

1. ALL INFORMATION ON THE PLAN MUST BE CHECKED AND DISCREPANCIES MUST BE BROUGHT TO THE ARCHITECT'S ATTENTION BEFORE BUILDING COMMENCES
2. ALL LEVELS AND DIMENSIONS MUST BE CHECKED ON SITE
3. ALL WORK AND QUALITY OF MATERIALS MUST COMPLY WITH NBR AND ALL OTHER APPROPRIATE AUTHORITIES
4. FOUNDATION EXCAVATIONS AS WELL AS FULL SURFACE AREA BELOW ALL DECKS AND FLOORS MUST BE TREATED WITH SABS 1501 AND 1511 AS WELL AS ENGINEERS PLANS AND SPECIFICATIONS. CONCRETE CURE TESTS TO DETERMINE STRENGTH OF CONCRETE MUST BE PROVIDED FOR APPROVAL BY ARCHITECT/ENGINEER
5. WHERE ANY SURFACE DIFFERENCES IN FOUNDATION OCCUR THE HIGHEST SECTION MUST BE EXTENDED OVER THE LOWEST FOR A DISTANCE EQUAL TO THE THICKNESS OF THE FOUNDATION.
6. FOUNDATION EXCAVATION FOR OUTSIDE BRICK WALLS MUST NOT BE LESS THAN 400mm UNDER THE SURFACE OF THE ADJOINING FINISHED GROUND LEVEL.
7. FILLING UNDER SURFACE BEDS AND CONCRETE PAVING MUST BE OF AN ACCEPTABLE MATERIAL AND FILLING MUST BE TREATED WITH TERMITICIDE POISON AS INDICATED ABOVE. COMPRESSION TESTS MUST BE PROVIDED BY CONTRACTOR TO BE APPROVED BY ARCHITECT/ENGINEER
8. CORRECT WITH BRICKWORK MUST BE PROVIDED IN EACH THIRD COURSE IN ALL BRICK WALLS, EXCEPT WHERE SHOWN OTHERWISE
9. ALL CHAIN PIPE WORKS AND MATERIAL MUST BE ACCORDING TO NBR REQUIREMENTS
10. ELECTRICAL INSTALLATIONS MUST BE STRICTLY ACCORDING TO APPROPRIATE REGULATIONS
11. CORRECT WITH BRICKWORK MUST BE PROVIDED IN EACH THIRD COURSE IN ALL BRICK WALLS, EXCEPT WHERE SHOWN OTHERWISE
12. ALL BRICK WORK IN OTHER STORIES MUST BE ACCORDING TO NBR REQUIREMENTS
13. ALL GLAZING MUST BE ACCORDING TO SABS 1501 AND 1511 AS WELL AS ENGINEERS PLANS AND SPECIFICATIONS
14. ALL CHAIN PIPE WORKS AND MATERIAL MUST BE ACCORDING TO NBR REQUIREMENTS
15. ELECTRICAL INSTALLATIONS MUST BE STRICTLY ACCORDING TO APPROPRIATE REGULATIONS
16. THE USE OF TRADE NAMES IS SUBJECT TO THE ADDITION OF "OR SIMILAR APPROVED PRODUCT"
17. ALL SHEET METAL MUST BE FREE FROM ANY WHITE RUST
18. ALL TIMBER ROOF TRUSSES MUST BE TREATED WITH TERMITICIDE RESISTANT SUBSTANCE OR SIMILAR APPROVED
19. WALL TIES SHALL BE INSTALLED IN ANY CAVITY WALL IN AN EVENLY DISTRIBUTED PATTERN AT A RATE OF NOT LESS THAN 3 TIES PER SQUARE METER OF FACE WHERE THE CAVITY IS MORE THAN 75mm IN WIDTH
